Ahmad Azimi

Software Engineer | Frontend Engineering | Systems & DevOps

GitHub: github.com/aziimii Portfolio Résumé: Online résumé (this site)

Email: your-email@example.com LinkedIn: linkedin.com/in/<your-handle>

PROFESSIONAL SUMMARY

Software engineer with experience spanning frontend development and systems and network administration. Comfortable working across the stack — from React and TypeScript interfaces to APIs, Linux servers, containers, web servers, and delivery pipelines. Focused on maintainable implementations, reliable delivery, and understanding how applications behave in real environments.

TECHNICAL SKILLS

Frontend

React · JavaScript · TypeScript · HTML · CSS · Responsive UI · Component-based architecture

Backend and APIs

Node.js · NestJS · REST APIs · Service integration · WebSocket integration

Data

PostgreSQL · SQL · Data analysis

Infrastructure and delivery

Linux · Docker · Docker Compose · Nginx · CI/CD · Deployment and web operations

Engineering practices

Debugging · Maintainability · Troubleshooting · Documentation · Security-conscious operations

No proficiency ratings or year counts are listed, because none are verified.

PROFESSIONAL EXPERIENCE

Software Development & Marketing Engineer

23 September 2025 – 21 May 2026

Ghasdak Peyk Shahr (قاصدک پیک شهر) · Remote

Remote engineering role combining frontend development with infrastructure, deployment, and web operations responsibilities.

`Frontend development` `DevOps and software infrastructure` `Website management and maintenance` `CI/CD and software deployment` `Website security` `Data analysis` `Digital marketing`

- Developed and maintained frontend functionality for web-based products and business websites.
- Supported application infrastructure, deployment, and operational maintenance.
- Contributed to CI/CD and software delivery workflows.
- Performed website troubleshooting and security-related operational tasks.

- Contributed to data analysis and digital marketing activities alongside software development responsibilities.
- Worked remotely to support ongoing development and operational activities.

Draft descriptions supplied by Ahmad Azimi — responsibilities, not measured performance outcomes. No metrics, team sizes, or budgets are claimed.

note

Only the verified record above is published. Earlier roles, education, and certifications will be added once source material is available.

SELECTED PROJECTS

Sherafat Gold Platform

Software engineer — frontend, service integration, and deployment · Ongoing

An ongoing software engineering project focused on a gold-price platform with a web frontend and multiple backend services.

React · TypeScript · Vite · MUI · NestJS · PostgreSQL · API gateway · Docker Compose · Nginx · WebSockets

Frontend Engineering & Application Interfaces

Frontend engineer · Selected work

Selected frontend work: component-based interfaces, responsive layouts, typed React implementation, and API integration that stays maintainable.

React · TypeScript · JavaScript · HTML · CSS · Responsive UI · Component architecture · REST integration · Forms and validation

Systems, Deployment & Infrastructure

Systems and deployment engineering · Selected work

Verified experience with Linux servers, Docker Compose stacks, Nginx configuration, CI/CD pipelines, TLS, and operational troubleshooting.

Linux · Docker · Docker Compose · Nginx · TLS/certbot · CI/CD · GitHub Actions · Web operations · Backup and restore

SECTIONS AWAITING VERIFIED INFORMATION

Education — to be completed

Degrees, institutions, and graduation dates must come from verified source material before this section is filled in.

Languages — to be completed

Language proficiency has not been verified and is intentionally left unlisted rather than guessed.

Certifications — to be completed

No certifications are claimed here. Add only those that can be verified.

`Earlier experience — to be completed`

Employers, titles, and dates before September 2025 will be added once verified records are available.

ADDITIONAL INFORMATION

- Open to international, remote, and relocation opportunities.
- Works comfortably in remote, distributed settings — the most recent role was fully remote.
- Written technical documentation alongside code: architecture, development, and deployment guides.
